This holiday card easily converts into a cube-shaped ornament you can hang on your tree. The ribbon even does double duty as a hanger. Here's how to make the ornament:

1. Slip off the ribbon and cut around the photos and green tabs (see diagram A) to remove the cube ornament.
2. Fold the green tabs behind the pictures.
3. Fold back the pictures that have tabs so that the tabs are in contact. Apply a glue stick to those tabs and press them together.
4. Fold back the 2 remaining photos. Before gluing them in place, glue the knotted end of the ribbon inside the cube so the loop sticks out of the cube, as shown.
5. Complete the cube by gluing the last 2 photos in place. Tip: Use a toothpick inserted through one of the corners to help apply pressure to the tabs from the inside of the cube.

HAPPY HOLIDAYS!
