

1. Print all of the pages of the Valentine Heart Mobile out on white card stock. You can print out the pages as many times as you like to get your desired number of hearts.
2. Fold each sheet of paper along the dashed gray line and cut out each heart. Be sure to leave the hearts attached at the dashed line.
3. Cut a piece of fishing line, ribbon, sting, or twine as long as you would like your mobile to be. Remember to leave some room at the top so you can tie your mobile to the object it will hang from.
4. Tape the top end of your string or ribbon to a flat working surface to hold it steady. Next, pick out your first heart and open it so that the blank side of the heart is facing up. Lay the string or ribbon directly in the middle (see diagram below) of the heart. Tape the string or ribbon to the center then cover it in glue. Fold the other half of the heart over and press down firmly to ensure that it sticks to the string or ribbon.

5. Repeat Step 4 with as many of the hearts as you desire, going down the line. You can put them in any order and you can place a smaller heart in the center of a bigger heart with the center cut out (see above diagram). You can also cut some of the hearts out using crimped scissors for a unique look. Or you can place a photo in the center of a heart.
6. When you finish, cut the sting or ribbon at the bottom of the last heart and hang your heart mobile(s) anywhere you like. Experiment and have fun creating!
