

The Amazing Origami Rock Craft

Instructions:

Learn the ancient art of origami with this super-simple craft.

Use an 8 ½ x 11 piece of paper, cardstock, or construction paper for this project. You can color your paper before you begin your folds to make the rock more rock-like.

1. Fold the paper in half, length-wise.
2. Fold in half width-wise.
3. Repeat on both sides.
4. Take the left corner and fold diagonally along the center line, like you are making a paper airplane.
5. Take the right corner and do the same.

Tip: If you are having trouble following some of the steps, skip to Step #12.

6. Take the bottom left corner and fold diagonally along the center line, like you did in Step #4.
7. Take the bottom right corner and do the same.
8. Score all of the diagonal folds with a pen or butter knife.
9. Unfold the diagonal folds so that the paper is now folded width-wise in front of you.
10. Fold the paper in half again, width-wise.
11. Fold the paper in half, length-wise, twice.
12. Open up the template so you can see all of the fold lines on the paper.
13. Take both hands and crumple the paper into a ball. Your origami rock is now complete!

(April Fools! Step #13 is the only step that is really needed for this craft.)
