

To make the diamond templates, print both pages 3 times. Overlap the pages by lining up the stars one exactly on top of the other, A with A, B with B, and so on (hold the sheets up to the light if you're having trouble seeing through the paper). Tape the templates together and cut out the strips. Lay them on your strips of white felt. Using scissors, cut along the diagonal lines — through both the template and the felt. You should end up with a total of 87 diamonds.
