

1. Cut out the top of the dreidel. Be sure to cut the three small slits, too. Make each of the long folds away from you, as shown in the diagram. Fold the four small tabs, that were created by cutting the slits, towards you. Glue tab Y first, then glue tab X to the blank side of the last panel.

2. Taking the main dreidel piece, glue tabs A, B and C first, which will create the point of the dreidel. Next, glue D and E. Glue tabs F, G, and H last.

3. Put glue on the blank side of the four slits from the top of the dreidel and attach it to the flat side of the dreidel, as shown in the diagram.

4. Your dreidel is now complete. Give it a spin and use it as a Hanukkah decoration.
