

Use these labels to help organize and cheer up any kids' room.

Materials:

Ink Jet Printer

Sticker Paper for Ink Jet Printers

Scissors

Step 1: Print

Load sticker paper into printer following manufacturer's instructions. (Handle paper by the edges to avoid fingerprints.) Print the **Labels Template**. (For best results, load only one sheet at a time.)

Tips & Tricks:

To select the proper print settings in Adobe Acrobat click Print; in the print dialogue box select properties; choose the appropriate paper type; then select the highest print quality.

We recommend that you run a test print on regular paper to double-check the layout and design. (If problems occur, check your printer manual for additional printing instructions.)

Step 2: Dry

Let paper dry several minutes before handling.

Step 3: Cut & Stick

Cut out your labels, mark them as desired, and stick them on containers, boxes, drawers, or other areas of the room.
