

Print out the bookmarks on regular paper or cardstock, cut them out, and fold them along the dashed line.

To make the bookmark “grab” a page, tape or glue small magnets to the inside of the bookmark (the blank sides). Make sure the magnets are glued properly so they don’t repel. Place the bookmark around a page to hold your spot in a book.

To make a basic two-sided bookmark, without the magnets, glue the two sides together so the design shows on the outside. Place it in a book like a regular bookmark.
