

front piece

right piece

left piece

Instructions

1. Print out the King For The Day Crown and give it to your child to color.
2. Cut out the front, right, and left pieces of the crown.
3. Glue the tab on the right piece to the back of the front of the crown (as shown in the diagram). Glue the tab on the left piece of the crown to the back of the front piece. Now complete the circle by gluing the tab on the left piece to the back of the right piece. If the crown needs to be tighter, then glue the tab further in along the right piece.
